CAMSO SNOWMOBILE TRACKS

WHATEVER YOUR STYLE IS, CAMSO HAS THE RIGHT TRACK

QUEL QUE SOIT VOTRE STYLE,
CAMSO A LA BONNE CHENILLE

It doesn't matter if you're a recreational rider or a racer, whether you prefer groomed trails or back country exploration, whether you seek the adrenaline rush of steep terrain or the comfort of a casual cruise in the countryside. As riders, we share one thing: our passion for snow. We love it. We pray for it. We live the journey.

To get the maximum excitement out of your sled in the conditions you prefer, select the best track for the type of rider you are.

TRAIL / SENTIER

You're someone who loves well-defined routes, a cruiser doing big mileage, an aggressive rider with a thrill of top-notch traction, or a power rider flooring it on the straightaways.

- Groomed snowmobile trails
- Ungroomed trails used enough to be compacted most or all of the time
- Bare or lightly covered ice with special traction challenges

CROSS-COUNTRY / SKI DE FOND

You prefer deeper, looser snow. Racking up the miles in the back country? Check. Half on-trail, half off? Check.

- Ditch lines
- Less-used and completely ungroomed trails
- Boondocking in remote areas with no trails

MOUNTAIN / MONTAGNE

You relish any trip that involves high country open meadows, boondocking in the trees and lots of deep snow.

- Deep powder snow with a light track for maximum traction and flotation
- High-altitude terrain
- Steep slopes

UTILITY / UTILITAIRE

You're working in the snow. You have a job to do in demanding and unpredictable conditions.

- Transportation of personnel and tools
- Pulling equipment and material
- Unpredictable snow and terrain

RACING / COURSE

You are doing competition on a specific terrain and controlled course:

- Asphalt
- Ice and grass drag
- Ice oval
- Snocross
- Snow and hill drag

CAMSO TRACKS: TRAIL / CHENILLES CAMSO : PISTE

Backcountry Riders / Pilotes hors-piste don't need any second invitations to head out into untravelled pristine powder and deep snow

HURRICANE 175 —DOMINATE DEEP BACKCOUNTRY

Inspired by mountain track lug geometry, the Hurricane 175 is the perfect balance between deep snow technology and trail-gripping adrenaline. Its 1.75-inch cupped profile design will take you deeper into the backcountry and out again

- Designed based on mountain tracks, it provides off-trail performance in deep snow while maintaining on-trail agility
- 1.75-inch tall lug profile design reduces vibration, applying more power to the ground both on and off trail
- Optimized column positioning for better track efficiency and enhanced traction in deep-powder snow while ensuring durability in all conditions

POWLIFTER 310

Camso is proud to unveil the Powlifter 310, the first-ever mountain snowmobile track co-developed with a pro-rider—bringing together 30+ years of Camso deep-snow expertise and Chris Burandt's in-field riding insights. Camso's ambition is to elevate what riders expect from their mountain track and to give snowmobilers pro-level confidence, power and control.

The Powerlifter 310 is the go-to upgrade for high-performance snowmobiling in deep powder across North America. Camso aims to convert passionate riders in the mountain areas, who are chasing explosive lift, mountain-grade strength, and agile control

CONQUER 260 —AGILITY IN DEEP SNOW
AGILITÉ DANS LA NEIGE PROFONDE

Designed with a softer rubber compound for better deep-snow performance, the Camso Conquer 260's 2.6-inch lug design powers through the deepest mountain snow with ease. This lightweight track increases your machine's available horsepower, requiring less throttle input in turns and on side hills.

- 2.6" alternating single-angled lugs push performance in all snow riding conditions
- Lightweight model increases available HP thanks to less rotating mass
- Lug design requires 20% less rider input on turns and 25% less throttle to hold on side hills

CAMSO TRACKS: RACING / CHENILLES CAMSO : COURSE

You're working in the snow. You have a job to do in demanding and unpredictable conditions.

RIDING TO WIN / ROULER POUR GAGNER

The speed you need to compete with the best / La vitesse qu'il vous faut pour rivaliser avec les meilleurs

If you're an asphalt, ice and grass drag, snocross, ice oval or snow and hill drag racer, you need tracks that are optimized for racing on competitive courses. When the crowd roars, you know that adrenaline isn't enough to get you across the finish line first.

HACKSAW

HI-PERFORMANCE SPEED-RATED TRACK

Get More Power to the Snow

Don't waste your sled's power under the snow flap. Skip engine mods that could void your warranty—a Camso high-performance speed track puts your power to work, no matter your sled's age.

Instant Response, Maximum Control

Experience immediate acceleration, improved stability, and reliable performance. Camso tracks deliver the traction and control your sled deserves.

- Crescent lug design with recessed tips and cutting edge for good forward and lateral bite
- Rigid lugs offer excellent durability and longevity for miles and miles of use
- Narrow lug base means less rolling resistance for maximum top speed
- 1" lug weight for low rolling resistance that improves fuel economy

SNO-X

High-performance designs, custom-tailored for snocross competition and tested and proven by professional race teams. Firm lugs and specialty rubber compounds provide the best holeshots, keeping you ahead of the pack.

- 1.75" lugs, the choice of professional racers
- Calculated lug stiffness for best holeshoot
- ISR approved for use in mod class

GRASS / ICE DRAG DESIGN

Designed specifically for the intense acceleration of drag racing, where the first seconds of the race make the difference between winning and losing.

- Low-resistance 0.525" lugs require less fuel for optimal straight-line acceleration
- 13.5" width available for lightweight and maximum top speed
- Multiple lengths for a wide variety of race chassis

STUD BOY POWER POINT CARBIDE PUSH-THROUGH CARBIDE SNOWMOBILE STUD POINTES DE POUSSÉE EN CARBURE POWER POINT DE STUD BOY

This "Power Point" stud offers outstanding light weight performance and durability for the trail, as well as on the track! This stud offers 60° carbide point for superior penetration and strength. The 1" diameter "Track Trapping" head size design, provides superior support, and reduces the "cookie-cutter" effect used by others that lead to track failure. Special "tapered" shank and thin penetration profile, provides rigidity that ensures traction. Standard lock-nuts included.

- Studs .875" - 1.280" include Standard lock-nuts
- 1.375" or taller Studs include Power Tower Support Nut

STUD BOY SINGLE POWER PLATE & DOUBLE POWER PLATE SNOWMOBILE STUD BACKER

PLAQUE DE SUPPORT SIMPLE ET DOUBLE POUR BROCHES DE MOTONEIGE STUD BOY SINGLE POWER PLATE & DOUBLE POWER PLATE

The POWER PLATE Backer is the industries best backer! This innovative shape provides great stud support and is almost unbendable. We added a radial lobe to a standard 1.125" backer by reducing wear and tear on the track and increasing stud rigidity. By decreasing the weakest flat corner area of the square backer we have reduced unnecessary weight and bending of the corners for a super strong design. Light-weight and durable, use the Power Plate aluminum backer and receive the best benefits of both square and round backers in one design!

POWER PLATE Aluminum Double Backer - The #1 choice of many Snowcross racers and aggressive trail riders, this ISR legal aluminum double backer features light-weight rigid mounting for two (2) 5/16" studs. This durable design is lighter than two (2) aluminum single backers, and allows for extra scratch lines when studding for aggressive performance.

iGrip is a Canadian company, specialized in the design and manufacturing of screw studs since 2015, with over 10 years' experience in the field. The reputation of their products is renowned, because of their safety, their simple installation and our comprehensive range of long-lasting solutions suitable for any weather condition. We have several kinds of studs designed for automobiles, agricultural vehicles, heavy and light machinery, recreational vehicles, snowmobiles, forest vehicles, military vehicles, mining vehicles and bikes, as well as for safety boots.

All iGRIP studs are manufactured in hot dipped steel to maximize their durability and with a zinc heat galvanization process which acts as a shield against corrosion. All studs are equipped with a Tungsten carbide point to provide a continued and increased traction. This is possible thanks to unparalleled depth of the stud's anchoring in the ice. Easy and quick to install, especially because of the tool provided, the iGrip stud may be used without any difficulties more than one season on new or used tires. As well, the studs are easy to remove, as needed.

BENEFITS OF USING iGRIP® STUDS

- Easy to install and to remove –tools and guide included
- Enhanced off-road performance
- Fuel economy
- Excellent alternative to chains (less noisy and expensive)
- Excellent alternative to traditional tire studs
- Enhanced safety
- Better grip
- Improved vehicle braking capacity
- Lasting durability
- Light
- Noiseless
- More stable driving

STUD TYPES

For many years iGRIP has offered **ST-type (standard thread) studs**. However, in order to improve the product range, iGRIP has added two stud types to the stock, thus answering to the customers' needs. The **SS (shoulder studs)** models were designed for heavy machinery and all kinds of vehicles used in extreme conditions and environments. As well, there are **SF (spark free) model studs**, which, as the name suggests, do not create sparks when in contact with the ground.

ENHANCED SAFETY / SÉCURITÉ AMÉLIORÉE

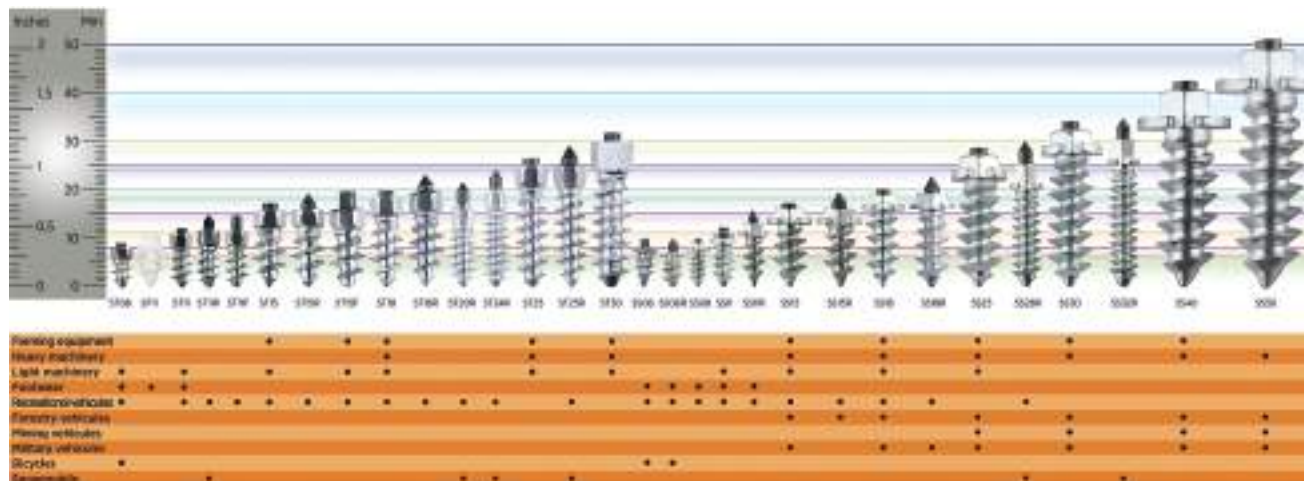

Footwear, tires and tracks will immediately have an increased level of safety after the installation of iGRIP studs, which allows better control of the vehicle when used in slippery terrains.

SUITED TO YOUR REALITY / ADAPTÉ À VOTRE RÉALITÉ

It is possible to choose and vary the number of studs inserted in the tire or in the footwear soles in order to respond to specific needs. Moreover, the variable depths and lengths guarantee an optimal grip of the tires, tracks or boot soles on ice, snow, mud, slippery rocks or frozen roadways. For control, effectiveness and safety, choose among our wide selection of versatile screw studs.

3 Stud Models:

- ST - Standard Thread Stud
- SS- Shoulder Stud
- SF- Spark Free Stud
