33-08488

- Specifically designed for use with KFI UTV 2.0 Tubes **#33-08409**
- Does NOT include the Tube System **#33-08409** (Purchase Separately)
- Does NOT include the Actuator **#33-08509** (Purchase Separately)
- Powder Coated TOUGH
- MADE IN THE USA

PRO 2.0 GLACIER PLOW MOUNT ADAPTER

ADAPTATEUR DE MONTAGE POUR CHASSE-NEIGE GLACIER

- 2.0 Glacier Adapter - SQ Tubes **#33-08409**
- Designed for Full-Size Polaris Rangers with Glacier Bumper
- Mid-Size machines (unless modified) are too low to use Glacier Adapter properly. If this mount fits on your full size machine but you have (or are going to install) tracks, larger tires, or a lift kit, we recommend using the alternate mount so that it will be compatible with our push tube leveling kits.
- Improper geometry can lead to a bad blade angle and/or force being applied incorrectly. The optimal height of the Glacier mounting location should be 14" from the ground. See image below for reference.
- If you have the original Round Style Push Tubes, the Glacier Adapter you would need is located here, **#33-48413**.

33-48499

HYDRAULIC ACTUATOR

ACTIONNEUR HYDRAULIQUE

33-08509

- Specifically designed for use with KFI UTV Tubes **#33-08409**
- KFI Electric (12 volt) Over Hydraulic Cylinder
