

## GGB STAINLESS STEEL UTV EXHAUSTS

TRAIL MUFFLER - ENHANCED PERFORMANCE,  
TUNED SOUND, LOW DB LEVELS

The GGB Trail muffler is constructed from 304 stainless steel and is a direct bolt on muffler that gives a deep tuned exhaust note, close to stock dB levels in the mid and high RPM's and does not require a fuel programmer. The Trail Muffler provides an increase in exhaust flow resulting in 1-3 HP gain with increased torque. Each system is a direct bolt-on fit and allows all factory body panels to be re-installed. Submersion in mud and water will not affect the integrity or the performance of the GGB Trail muffler as its fully welded stainless steel design with ZERO packing is built to withstand the punishment. The GGB Trail muffler is a direct bolt-on, zero maintenance exhaust system that can be run with or without a programmer. The Trail Series will easily meet J1287 sound regulation of 96dBA.

- Multi-chamber reactive muffler design
- Built entirely from 304 Stainless Steel
- ZERO Packing material
- ZERO Maintenance
- Designed to be run with stock programmer
- Increased HP and Torque
- Better throttle response
- Deep tuned sound throughout the entire RPM range

- Sound will not change over time
- Direct Bolt-On
- OEM style spark arrestor
- Reduced operating temperatures
- Deep water compatible
- All factory body panels re-install
- Easily meets all sound level requirements

## STRAIGHT PIPE - UNRESTRICTED SOUND AND PERFORMANCE

The GGB Exhaust Straight Pipe for the Can-Am Maverick X3 holds nothing back. Designed and manufactured completely in-house at GGB Exhaust, this pipe is built entirely from 2.5" OD 304 Smooth flow mandrel bent Stainless Steel. The Straight Pipe provides an aggressive exhaust note and one-of-a-kind tone. Couple the GGB By-pass pipe with this Straight Pipe and you have a super free flowing exhaust system designed to make the most power possible for a modified engine.

In hand, you will notice the build quality and fit and finish of the product we deliver, and installation is straightforward as each system is a direct bolt-on using factory mounts and all necessary hardware to install is included. No fuel programmer is required but recommended.

- Aggressive and unique Exhaust Note
- Quicker Spool Times
- Dyno proven design netting up to 3 additional HP
- No programmer required, Stock programmer maintains correct air/fuel ratio
- Unrestricted flow will net even greater power gains when a programmer is utilized
- Significant Weight Savings

- Runs Cooler than Stock
- 2.5" OD Smooth flow mandrel bent Stainless tube
- All factory body panels re-install
- Simple Install
- Secure Fit

## BYPASS PIPE - UNLEASH YOUR CAN-AM SXs

The GGB Exhaust Bypass Pipe for the Can-Am Maverick X3 increases flow and creates a one-of-a-kind tone. Designed and manufactured completely in-house at GGB Exhaust, this 2.5" OD pipe is built entirely from 304 Stainless Steel. Our team has gone above and beyond on this design. The GGB Bypass Pipe works great with the stock muffler or with the GGB Exhaust Trail Muffler. You will notice an increase in throttle response and power throughout the power curve and drop unwanted heat in the exhaust system.

In hand, you will notice the build quality and fit and finish of the product we deliver. Installation is straightforward as each system is a direct bolt-on using factory mounts and all necessary hardware for installation is included. No fuel programmer is required.

- Improved Performance
- Improved and Unique Exhaust Tone
- Fits OEM Muffler or GGB Exhaust Trail Muffler
- Dyno proven design netting up to 3 additional HP on its own
- Increased flow for additional power and cooler run temps
- Facilitates greater power gains when a programmer is utilized

- 2.5" OD Smooth flow mandrel bent Stainless tube
- Significant Weight Savings
- No programmer required; Stock programmer maintains correct air/fuel ratio.
- 304 Stainless Steel
- All factory heat shields re-install
- Simple Install
- Secure Fit
