- 5.3 Advice for fire-fighters:
  - Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible. Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection.
  - As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions.
  - Keep out of low areas.
  - Keep unauthorized personnel away
  - Stay upwind.
- 5.4 Additional information:

## Section 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures
  - Ventilate enclosed areas. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
  - 6.1.1 For non-emergency personnel
    - Protective equipment:
    - Wear chemical gloves
  - 6.1.2 For emergency responders
    - ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area) as an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Do not get water inside container.
    - Personal protective equipment:
    - Wear chemical gloves, goggles, acid resistant clothing and boots, respirator if insufficient ventilation.
