ATV A-ARM UPGRADE REBUILD KIT / KIT DE RÉPARATION DE MISE À NIVEAU DES BRAS DE SUSPENSION A-ARM POUR VTT

BRUTE FORCE KVF 650I & 750 UPPER AND LOWER A-ARM UPGRADE KIT

KIT DE MISE À NIVEAU DES BRAS A SUPÉRIEURS ET INFÉRIEURS BRUTE FORCE KVF 650I & 750

The OEM design incorporates small spherical bearings that carry the thrust load of the entire front end of the machine
As the spherical bearings become loose, the external seals become ineffective due to excess play – allowing contamination to pass into the assembly
The upgrade kit contains parts for the entire front end of the machine. Field tested for proven durability
All Balls Upper & Lower A-Arm Upgrade Kit contains the parts needed for all four Front A-Arms

NEXT- LEVEL BRAKE PERFORMANCE & ENVIRONMENTAL IMPACT
PERFORMANCE DE FREINAGE DE NIVEAU SUPÉRIEUR ET IMPACT ENVIRONNEMENTAL

Introducing a new type of compound that is both purer in composition and has improved performance characteristics. The new product series will be named **SBS Better Brakes.** The first products to be transitioned and introduced in the new SBS Better Brakes-series, are the popular SBS HF, SP, HS, and MS ranges.

Improved Brake Performance and Stopping Power
Riders will get a better and more stable brake performance. The re-engineered compound formulas enable an improved Coefficient of Friction that provides a more efficient brake grip throughout the braking sequence. This results in a significantly reduced stopping distance, of up to 12%. The new Better Brakes-series are designed to maintain a static fade level throughout after being heated and with improved heat resilience that enables a consistent braking experience with more sense of control and comfort throughout the ride.

0% COPPER (for sintered brake pads)
NICKEL (for sintered brake pads)
ANTIMONY (for ceramic brake pads)

Updated Packaging
To differentiate the new from the old by looking for the Better Brakes icon that will be located below the product reference codes. Customers will also be able to refer to the same product reference codes as transition will happen continuously and encompass complete product ranges.

BRAKE PADS & SHOES / PLAQUETTES DE FREIN

ROCK HARD POWERSPORT ACCESSORIES

ROCK HARD CONTINUES TO OFFER THE BEST IN AFTERMARKET PERFORMANCE BRAKING COMPONENTS.
ROCK HARD CONTINUE D'OFFRIR LE MEILLEUR EN ÉLÉMENTS DE FRAINAGE.

When looking for brake pads, the key thing to remember is the coefficient of friction rating for that pad. This is a 2 letter ratings system **(see graph below)**. The first letter is the cold temp coefficient rating and the second letter is the hot temp coefficient. The higher the letters, the higher the coefficient of friction.

FF | DOT RATING

SEMI-METALLIC:

0.44 0.45 at both Temps 0.22%
Fade Possible At 600f

Our semi-metallic brake pads & shoes are composed of a non-asbestos, semi-metallic carbon kevlar aramid fiber from DuPont.

COEFFICIENT OF FRICTION (C.F.) AT 250F & 600F

This pad is well suited for most conditions. It has a minimal fade at high temperatures, and is good for performance applications.

GG | DOT RATING

FULL-METAL PADS

0.45 - 0.50 at both Temps Fading Very Rare

Our full-metal pads are composed of copper, carbon, tin, lead & other metallic elements.

COEFFICIENT OF FRICTION (C.F.) AT 250F & 600F

This pad is great for most conditions, as it will bed quicker on worn discs. This rating is great for performance applications.

Stainless steel reduces thermal conductivity by up to 90% compared to aluminum.

- Reduced braking temperatures provide better braking performance
- Eliminates the potential for becoming brittle or corroded like composite or chrome plated pistons, thus extending braking performance
- Eliminates failure prone ceramic inserts used on some models

- Overall height of tire (Inches)

Description	Advantages	Disadvantages
BIAS	• Strong sidewalls, tough casing • Better sidewall puncture resistance • Good lateral stability (hill side work) • Good in rough terrain and off-road • Self-Cleaning • Easily repaired • Lower purchase price	• Reduced life expectancy (50% of radial) • Lack of flexibility in casing reduces foot print and traction • Tread flexes more, generating more heat and rolling resistance. • Greater rolling resistance and fuel inefficiency • Profile of tire increases soil compaction and reduces traction
RADIAL	• Good high speed capacity • Longer lasting (Up to 50% longer) • Wear resistant • Low heat build-up • Lower rolling resistance • Better Fuel Economy • Better floatation and larger contact area • Less soil compaction • Better stability and machine handling • Smoother, more quiet ride • Proliferation of tires in the last 10 years has mostly been in radial	• More prone to puncturing • More difficult to repair • Higher purchase price

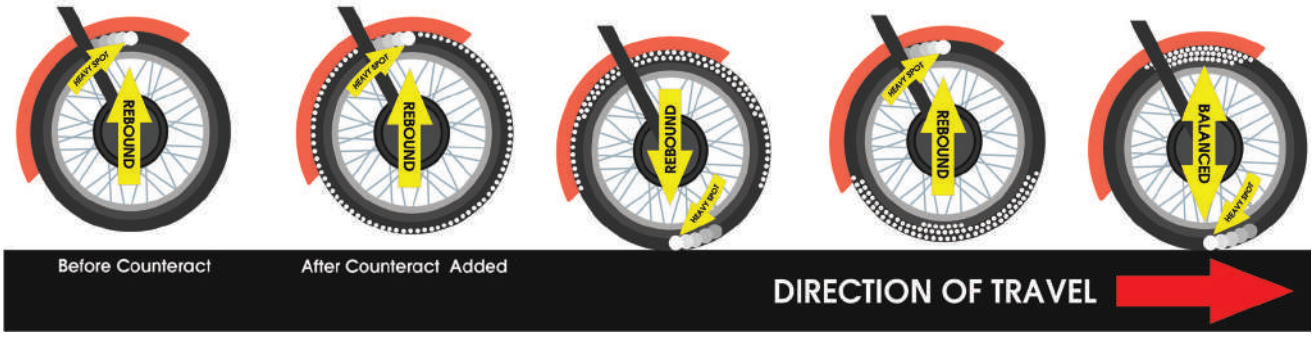
TIRE ACCESSORIES / ACCESSOIRES POUR PNEUS

COUNTERACT BALANCING BEADS / BILLES D'ÉQUILIBRAGE COUNTERACT

ADVANTAGES OVER LEAD WEIGHT MACHINE BALANCING / AVANTAGES PAR RAPPORT À L'ÉQUILIBRAGE AVEC DES POIDS EN PLOMB



Counteract Balancing Beads balance for the complete life of the tire due to their ability to readjust the balanced position as required... something lead weights are unable to do. Counteract balances the complete wheel assembly in all wheel positions on both trucks and trailers, as well as motorcycles, ATV's, motorhomes and classic cars. Counteract is protected from road hazards and obstructions inside the tire and will not fall off as lead weights can do.,. saving the environment from the problems caused by external wheel weights.

COUNTERACT BALANCING BEADS ARE SCIENTIFICALLY PROVEN / LES BILLES D'ÉQUILIBRAGE COUNTERACT SONT SCIENTIFIQUEMENT PROUVÉES

The beads are a unique technology, the only product of its type on the market. Environmentally friendly and completely trouble free. It is the preferred method of balancing all complete wheel assemblies.

HOW COUNTERACT TIRE BALANCING WORKS / COMMENT FONCTIONNE L'ÉQUILIBRAGE DES PNEUS COUNTERACT

The balancing beads are distributed around the tire as it begins to roll, through centrifugal force. As the centrifugal force increases. The heavy spot pulls up and down on the suspension, making the beads move in the opposite direction of the downward and upward motion, through inertia. The beads continue to migrate until the complete wheel assembly is balanced.

MAGNETO/STATOR / MAGNÉTO/STATOR

A Magneto/Stator is an electrical generator that uses permanent magnets to produce periodic pulses of alternating current to provide power to the spark plug(s). In some engine styles the stator can be located in an area that a derailed chain can cause damage to the stator and engine cover requiring replacement. Stators can also fail due to a number of reasons including shorts, water damage etc. If you are not generating power from your engine we recommend testing your stator to see if it needs replacement.

SOLENOIDS / SOLÉNOÏDES

If the unit will not start and simply makes a clicking noise, the issue is most likely either the Battery or the Solenoid (Starter Relay). If the battery tests ok and has passed the load test (very important to test load), a replacement solenoid is most likely necessary.

ATV/UTV ENGINE DRAIN PLUGS / BOUCHONS DE VIDANGE DE MOTEUR POUR VTT/CÔTE À CÔTE

The stock drain plug has two issues: the Allen head fills with dirt and strips out easily and the magnet is weak. We solved both issues with these machined steel drain plugs. Simply use a socket to remove and install and our magnet is 10 times stronger than stock! Finished with a beautiful Black coating and the Quad Logic gear logo. Includes a new crush washer.

ACTIVE CORROSION SOLUTIONS
SOLUTIONS ACTIVES CONTRE LA CORROSION

PROTECTS • PENETRATES • LUBRICATES / PROTÈGE • PÉNÈTRE • LUBRIFIE

ACF-50 chemically treats metal using advanced polar bonding technology. It forms a "hydrophobic" film as it removes moisture from the metal surface. ACF-50 contains no water and is approved for electrical switches and connectors. ACF-50 has a strong capillary action so will creep into all the areas that moisture can; actively pushing out moisture and replacing it with protection. Where corrosion is already evident, ACF-50 will help inhibit further progress by insulating and electrically 'switching off' the corrosion cell.

TOOLS / OUTILS

BEADBUSTER

XB-550i

The BeadBuster XB-550i Heavy Duty OTR bead breaker is the big brother of the original XB-450. All of the 45X series tools have the same design geometry, but the 550 tire tool for big trucks is larger in every way. Heavier steel, thicker walls, more extension; the BeadBuster XB-550 tractor tire bead breaker was designed to handle the BIG tires that you'll find on agricultural and industrial OTR wheels, large trucks, military vehicles, etc. However, we created a patented configurable ram foot that can accommodate a large range of rim lip sizes, and it will still work on ATV/UTV*. There are 4 different foot length configurations, so that you can get the feet as close to the Bead Seat as possible without touching the Bead Retainer, but still get good purchase on top of the Bead Bundle. It's still far more portable than any other OTR bead breaker, and much less expensive. If you are a farmer, business owner, or a large vehicle enthusiast; you can use this pneumatic tire bead breaker to easily change your own tires whenever, and wherever you want.

SLIME TIRE SEALANTS / SCELLANT SLIME POUR PNEUS

Slime tire sealant is recommended as an emergency repair for flat tires or a slow leaks in high speed vehicles, over 65mph. Simply remove the valve core from your tire, inject Slime, re-inflate it and rotate it. Slime tire sealant can be installed as a pre-treatment before a puncture occurs to prevent flats in slower vehicles under 65mph, such as ATV's, farm and ag equipment, trailers, off-road vehicles, etc. Once installed into the tire, Slime remains liquid, evenly coating the inside. When a puncture occurs, the escaping air forces Slime into the hole where it creates a long-lasting, flexible plug. It's non-flammable, non-toxic and water soluble.

2 IN 1 TIRE & TUBE SEALANT
SCELLANT POUR PNEU ET CHAMBRE À AIR 2 EN 1

Does your tire have a tube inside, or is it tubeless? Who cares?!

- Great for preventing flat tires in: bicycles, dirt bikes, ATVs/UTVs, golf carts, riding lawn mowers, small trailers, tractors, scooters and all other non-highway tires

5 GALLON TIRE SEALANT BUCKET
5 GALLONS DE SCELLANT POUR PNEUS

SLIME Tire Sealant prevents and repairs flats in tubeless tires caused by puncturing objects up to 1/4" (6mm). SLIME's non-toxic, non-flammable, non-aerosol and water soluble liquid installs into the tire by first removing the valve core and then applying through the valve stem. Or, for tubeless bike tires, SLIME installs between the rim and the tire bead. Hold the bead open with two tire levers, install, and re-inflate with a fast burst of air to seat the bead to the rim.

Part No.	Code	Keyword
01-05019	B	3

WARNING/ AVERTISSEMENT: For high speed application (over 65 mph) use only as a repair - may cause excessive vibration when installed in front tires - to ensure safety, have treated tire inspected by qualified tire professional as soon as possible after puncture occurs. Slime will not seal sidewall punctures and should not be used with faulty valves or damaged rims. Eye protection must be worn during installation.

ATV BEARING GREASER TOOL /
OUTIL DE GRAISSAGE DES ROULEMENTS POUR VTT

It's a well known fact that the stock wheel bearings are dangerously low on grease right from the factory and bearings will wear out quickly if you don't pack them with additional grease. Keep them running longer and stronger by using this trick bearing greaser. It handles all the dirty work for you. Just remove the wheel and axle nut, slide the greaser in place and pump it full of grease. You'll be amazed at how much grease they will take. Even old bearings will benefit, getting rid of any water or dirt that may have built up in the bearing possibly causing premature failure. Billet aluminum construction with black anodized accents. Includes grease zerk and O-ring.

MR. FUNNEL

PROTECT YOUR ENGINE
PROTÉGEZ VOTRE MOTEUR

Dirt and water are practically unavoidable in stored fuel, causing microbial growth, corrosive acids, electrolysis and rust. These contaminants can Plug filters, corrode components, decrease efficient combustion and cause engine shutdown or system failure. You can combat these problems by refueling With the Fuel Filter Funnel. Protect your engine by using this innovative product every time you transfer fuel to your tank.

UNIQUE FILTER TECHNOLOGY
TECHNOLOGIE DE FILTRE UNIQUE

The Fuel Filter Funnel is a heavy-duty, anti-static, and fast flow funnel With built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.
