2025 SIZE ADJUSTMENT

All New Production Starting From 2025 will have adjusted product sizing

Toute nouvelle production à partir de 2025 aura des dimensions de produits ajustées

Sweep has updated their size labels to better align with industry standards. While the physical measurements of our products remain exactly the same, each garment now carries a size label that is one size larger than before to provide users an easier experience finding the right size. For example, if you previously wore a size L in our products, you'll now find the same exact fit in size XL. The only change is in the label the garment itself remains identical to what you're used to wearing and loving. **Note: this change impacts monosuits, jackets & pants. Other product types are not affected.**

Sweep a mis à jour ses étiquettes de tailles pour mieux s'aligner avec les normes de l'industrie. Bien que les mesures physiques de nos produits restent exactement les mêmes, chaque vêtement porte désormais une étiquette de taille qui est une taille plus grande qu'auparavant pour offrir aux utilisateurs une expérience plus simple dans le choix de la bonne taille. Par exemple, si vous portiez auparavant une taille L dans nos produits, vous retrouverez désormais le même ajustement exact en taille XL. Le seul changement se trouve sur l'étiquette, le vêtement lui-même reste identique à ce que vous avez l'habitude de porter et d'apprécier. **Remarque : ce changement concerne les combinaisons une pièce, les vestes et les pantalons. Les autres types de produits ne sont pas affectés.**

SPX PREMIUM EASY LOAD COVERS / HOUSSES DE CHARGEMENT FACILE HAUT DE GAMME

KEYWORD 17

Premium Easy-Load Features / Caractéristiques de Chargement Facile Haut de Gamme:

Made of durable 600D black polyester, with a built-in soft inner lining similar to Ski-Doo ride-on covers. Our premium Easy-Load Cover gives the ability to first cover a snowmobile then operate the machine for tasks such as loading/unloading a trailer or sled deck. Easy-Load simplifies storage and moving of snowmobiles by allowing access to the handlebars without having to remove the cover.

- Adjustable Quick Release Strap System
- Reinforced stress and wear points
- Custom tailored for excellent fit
- Easy gas cap access

3 MODELS

3 SOUND LEVELS

GGB MUFFLERS

GGB mufflers are flow bench & dyno tested to provide performance levels as good as or better than stock.

KEYWORD NET

MOUNTAIN CAN / SILENCIEUX POUR MOTONEIGE

Mountain Can mufflers are a super lightweight, straight through flow design and have an aggressive exhaust note when your on the throttle. Systems fit securely in the stock location using stock mounts, no modifications required. Most Mountain Cans weigh between 4-5½ lbs, & are designed for use in unpopulated areas. ***These mufflers are loud, please use accordingly.***

TRAIL CAN / SILENCIEUX POUR SENTIER

Lightweight mufflers with a trail tuned, deep muscle sound. These mufflers are not straight through and will provide lower sound levels than our Mountain mufflers. Systems fit securely in the stock location using stock mounts, no modifications required. Most Trail cans weigh between 6-7½ lbs and in most cases meet J2567 sound regulation of 88 dB, 4 meters away.

QUIET CAN / RÉSERVOIR SILENCIEUX

The GGB Quiet Can is designed for riders wanting to enhance the stock sound and save weight at the same time. At idle the Quiet Can delivers a deeper slightly louder exhaust note, transitioning to close to stock sound levels through the mid range and top end to keep the peace. Most Quiet can mufflers weigh between 9-10½ lbs and will easily pass J2567 sound regulation of 88 dB, 4 meters away.

2 STROKE PERFORMANCE / PERFORMANCE 2 TEMPS

GGB 2 stroke mufflers are flow benched for back pressure against the stock muffler and then dyno tested to maintain or make additional power. Performance levels with the GGB muffler will be as good as or better than stock. Fuel and clutching mods are not necessary prior to installation.

4 STROKE PERFORMANCE / PERFORMANCE 4 TEMPS

GGB 4 stroke mufflers provide an increase in exhaust flow and will provide moderate power gains over the stock muffler. Fuel or clutching mods are not necessary prior to installation. Most GGB 4 stroke Mountain mufflers ship with a "reducer" inside the outlet tube. This reducer can be removed for additional exhaust flow when adding fuel controllers or when engine mods are made for increased power.

Ultimax 3 has evolved into Ultimax Pro.

New Pro belt features a thicker cross section so more surface area contacts the clutch; this means less slippage over a broader speed range for quicker acceleration. New cog design dissipates heat and aids flexibility. Cooler running belts mean better performance and longer lasting belts. Run cool, run long, run fast with Ultimax Pro

Today's high horsepower machines can out perform yesterday's drive belts.

The Ultimax tradition of quality and innovation continues with the new Ultimax XS. It's the belt you've been waiting for to deliver peak performance and dependability never before available. Ultimax XS has increased strength and is built with new heat tolerant materials. With a revolutionary new compound, extra strong Aramid cord, and new manufacturing processes, Ultimax XS will run cooler, longer and faster. Extensive lab and field testing have proven that Ultimax XS can withstand the punishment that today's super-sleds dish out.

Now available in a set of six belts, Ultimax XS belts are designed to handle the brutal power and extreme temperatures of racing. Factory matched to tolerances that are three times tighter than standard belts. Ultimax XS belts are proudly made in the USA and feature a specially formulated rubber compound found in no other snowmobile belt. For peak power and peak efficiency, snowmobile racers choose Ultimax belts. When it comes time to change belts on their finely tuned clutches, race teams can now be assured of having perfectly matched belts. Although every Ultimax belt is manufactured to industry-leading specifications, there may be slight variations that do not impact most riders. Developed for the demands of racing, the Ultimax 6-Pack assures repeatable performance.

XTX

(Xtreme Torque) Snowmobile Belt / Courroie de motoneige XTX (Couple Extrême)

Introducing Dayco's revolutionary XTX High Horsepower Drive Belt. Bred from a rich history of experienced belt builders, the new XTX is specifically engineered to maximize the performance of high horsepower snowmobiles. Beating the competition on the CSRA race course is just one of many aspects that set the XTX belt apart from its competition. Specially formulated high temperature Polymer along with the highest level of engineered reinforcement proves to perform better in belt operating temperature and efficiency than leading competitors. Its innovative break-through design of deeper cogs on top and rounded cogs on the bottom yield the advantages of ultimate flexibility and longer belt life.

The Dayco XTX Belt Offers:

- Faster and more consistent throttle response at high speeds
- Quicker throttle response at mid-speed acceleration
- Greater secondary acceleration at high RPMs
- Greater secondary acceleration as primary acceleration increases
- Reduction in slippage during the highest levels of torque
- Providing more power to track
- Better performance during deceleration (more responsive engine braking)
- Tested and proven reliability at well over 12,000 RPMs
- A cooler-running temperature than the leading competitors Confidence in knowing you're covered with a one year warranty

HPX

(High Performance Extreme) Snowmobile Belt / Courroie de motoneige HPX (Haute Performance Extrême)

Featuring Dayco's TOP COG design for increased flexibility and longer belt life, this high horsepower belt is constructed with over-sized p-aramid cords and CVT rubber compounding to deliver the increased strength and durability that's required to stand up to today's higher snowmobile engine RPM's and operating temperatures. Enjoy the exhilaration that comes from knowing that when you need to "clutch-down", the Dayco HPX Snowmobile Belt will deliver a full range of power to attack any terrain without a loss of horsepower. This Dayco HPX Snowmobile Belt has been carefully inspected at the factory and has met rigid manufacturing specifications.

The Dayco HPX Snowmobile Belt is covered by a limited ONE-YEAR WARRANTY.

G-FORCE™ REDLINE™ CVT BELT / COURROIE CVT

Why G-Force™ RedLine™ CVT Belts?

- Greater heat resistance and recovery, even under severe duty cycles.
- Optimized, patented EE compound maximizes axial stiffness enabling belts to run at higher continuous torques or loads.
- Innovative design results in better acceleration, higher top speeds, less speed ratio and energy loss in extreme off-road environments.
- Improved durability, crack and wear-resistance means a longer-lasting, high-performance power transmission belt for the most demanding applications.
- Reduced environmental risk — made without harmful chlorinated compounds.

HOW TO CALCULATE THE STUDS REQUIRED FOR YOUR TRACK COMMENT CALCULER LE NOMBRE DE CLOUS NÉCESSAIRES POUR VOTRE CHENILLE

If your track is not included in this catalogue, you must know certain basic information about your specific track in order to calculate the quantity of studs you will need. The **length** and the **model** of your track are what you need to know.

By dividing the length of the track by the pitch you obtain the number of rows on your track. The graph below is provided to help you determine the number of rows quickly. So according to the pattern chosen, you can now determine the number of studs required.

Length	Drive Pitch			
	2.52	2.86	3.00	3.50
120		42		
121	48			
128	51			
129		45		
136	54			
137		48		
141			47	
144	57			
146		51		
151	60			
153			51	
154		54		
154				44
156			52	
162			54	
163		57		
165				47
174			58	
175				50

For example, if your track is 137" long, having a drive pitch of 2.86", by dividing 137 by 2.86 we obtain 48 rows. If now you choose to put 4 studs per row, $48 \times 4 = 192$ iGRIP studs. If you change your pattern to 5-4-4, which is an average of 4.3 studs per row $\times 48 = 208$ iGRIP studs.

CAMOPLAST TRACKS REVIVE YOUR RIDE LES CHENILLES CAMOPLAST REDONNENT VIE À VOTRE VÉHICULE

Any snowmobiler can improve the performance and safety of his or her machine with a new track. And a new track is much less expensive than a new sled. That's why we encourage riders to make it happen with a new Camso track.

MOUNTAIN & UTILITY SKIS / SKIS DE SENTIER

TMX

The Technical Mountain Xtreme or TMX is designed with today's technical mountain riders in mind. Compared to the previous BX model, the TMX is lighter and more finely tuned for mountain-specific performance.

- 6.75" wide
- 42" length
- 1.125" keel height
- Front to back rockered keel
- Widened keel improves steering effort on hard pack snow
- Overall ski side to side rocker to ease sidehill initiation and maintain grip
- Tapered and raised tail to help with sidehilling and cutting ability
- Traction grips on saddle and side of ski for boot grip
- Ski weight is 7.2 lbs (including handle)
- 1 lb lighter than its predecessor
- Made from UHMW Poly for ultimate durability

LEN PERFORMANCE SKI SHOCKS / AMORTISSEURS DE SKIS LEN PERFORMANCE

KEYWORD 16B

Len Performance reservoir snowmobile shocks are designed and built with the focus on the rider. Our shocks are ready to mount out of the box with preload adjustability and feature 5 click compression and rebound adjustments for front ski shocks and 5 click compression adjustment on all track shocks. These range of adjustments help the rider easily fine tune their suspension to whatever their needs may be. Our aluminum reservoirs feature a finned cooling system which helps prevent performance robing temperatures and increases longevity and performance under the harshest conditions. We use only high-grade materials including forged aluminum head and anodize all aluminum components for increased durability and corrosion resistance. With our focus on rider experience we have a network of rebuilders to help keep you on the trail.

Eyellet / Bushing - Forged Aluminum Head with Premium Steel and NBR bushings

Reservoir / Finned Reservoir - Finned cooling system helps decrease temperature and increases longevity and performance.

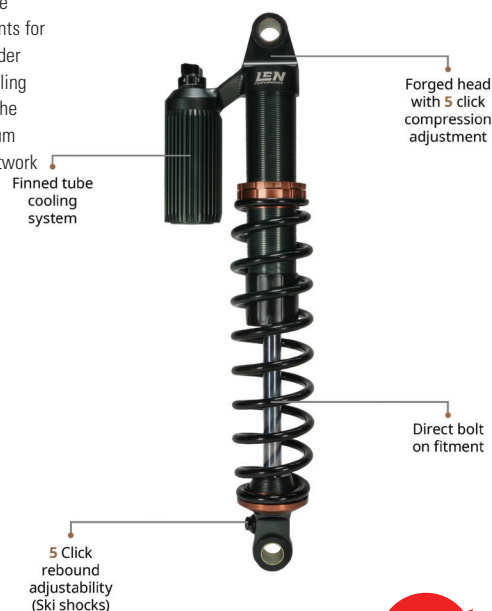

Compression & Rebound Adjuster - Len shocks come standard with a 5 stage compression adjustment. User friendly intuitive design features 5 click compression adjustments for seamless adaptation to any riders experience level in any condition. Annodized dual ring locking adjusters make it easy to adjust your preload but ensure they stay set once you have them adjusted.

Infinite Preload Adjustment - All springed shocks feature a threaded body for ultimate preload adjustability

Rebuildable / Tuneable - Value added rebuildable design increases the lifespan of our shocks and ensures performance for many years to come. Easily serviced with our expansive network of service centers

Shaft - Hardened Chromoly shaft increases overall strength and seal longevity

Spring - Springs are powdercoated to reduce corrosion, increase duarbility and ensure continued strength under the harshest of conditions

4 STROKE OILS / HUILES 4 TEMPS

It's widely known that if you want your four-stroke engine to last, you need to do three things: Stay off the rev limiter, don't let dirt get past the air filter, and keep fresh oil in it. While we can't help you with the first one, we can help with the second and have you covered with the third task. Maxima's advanced array of race proven four-stroke oils will extend the lifespan of your trusty thumper while simultaneously improving power and clutch performance. There's a reason so many top factory race teams trust Maxima Racing Oils. This. Stuff. Works!

SNOW 4T FULL SYNTHETIC

100% SYNTHETIC, ESTER-FORTIFIED 4-STROKE ENGINE OIL

HUILE MOTEUR 4 TEMPS 100% SYNTHÉTIQUE, ENRICHIÉ AUX ESTERS

- Recommended for all OEM equipment
- Formulated for snowmobiles and work/utility engines operating in cold weather extremes
- Superior protection and oxidative stability at any temperature
- Reduces temperature and increases power output
- Shear-stable, ester-fortified formula maintains oil viscosity and film thickness
- Surface-active chemistry aggressively attaches to engine surfaces and keeps them clean

2 STROKE OILS / HUILES 2 TEMPS

No matter which part of your two-stroke's powerband you most identify with, that little engine needs some regular love. Spoil your machine with Maxima's extensive lineup of clean burning, performance boosting, great smelling two-stroke engine oils, all of which were designed with durability in mind to keep your high RPM powerplant running great for years to come. Whether you're a direct injector or an old school fuel can shaker, your beloved machine will benefit from Maxima's 5+ decades of dominance in the premix oil market.

TUNDRA SNOWMOBILE FULL SYNTHETIC

HIGH PERFORMANCE 2-STROKE ENGINE OIL

HUILE HAUTE PERFORMANCE POUR MOTEUR 2 TEMPS

- Recommended for all OEM equipment
- Outstanding performance in DFI engines
- Formulated for snow machines in cold weather extremes
- Smokeless, low odor formula

TRANS/GEAR OIL / HUILE DE TRANSMISSION/ENGRENAGES

If you think that you are tired after a long ride, you should see what your machine's transmission goes through! Every flick of the shift lever and each pop of the clutch exerts unseen demands on your gearbox, which would literally shatter in a matter of minutes if it weren't for the protection offered by a legion of lubricants. Maxima's transmission and gear oils have been carefully formulated and thoroughly tested to bring championship-level standards of protection, smooth operation, enhanced engagement and excellent durability to the unnoticed workhorse that is constantly driving your engine.

CHAIN CASE LUBE

100% SYNTHETIC CHAIN CASE LUBRICANT

LUBRIFIANT POUR BOÎTIER DE CHAÎNE 100% SYNTHÉTIQUE

- Formulated to maintain exceptional flow in extreme cold
- Shear stable formula maintains viscosity and minimizes chain and sprocket wear
- Robust anti-wear and extreme pressure chemistries provide protection under high loads
- Advanced additive system keeps surfaces free of corrosion and minimizes oxidation
- Extends chain life by minimizing stretch and wear

SUSPENSION FLUID / LIQUIDE DE SUSPENSION

Maxima suspension fluids bring top-tier performance to some of the most complex—and consistently overlooked—components of your machine. Our high-performance suspension products ensure that as your fork and shock compress, friction is reduced, comfort is increased, and traction is maximized. When the suspension then rebounds—as it does hundreds of times per lap—Maxima's zero-fade fluids and oils maintain stability and control.

RACING SHOCK FLUID

HIGH PERFORMANCE SHOCK FLUID

LIQUIDE D'AMORTISSEUR HAUTE PERFORMANCE

- Designed for steel and aluminum bodied suspension components
- Advanced additive system reduces overall friction and decreases stiction
- Shear stable, high viscosity index formula maintains film strength and reduces wear
- Maintains optimal damping performance by minimizing foaming and air entrainment
- Keeps internals clean while eliminating corrosion and conditioning seals

MAINTENANCE / ENTRETIEN

Think of Maxima's maintenance products as an unwavering line of defense, protecting your machine from the brutal elements found on the track, trail, and everywhere in between.

BIO FOAM

ALL PURPOSE FOAMING CLEANER NETTOYANT MOUSSANT TOUT USAGE

Biodegradable, ultra-stable foam stays in place and works quickly to penetrate dirt, oil and other debris. Fast acting solution lifts debris from the surface, allowing easy removal with that saves time and money. Special surfactants allow better wetting of solids while advanced micro chemistry scrubs the surface clean. Thick foam layer is tough on dirt, yet gentle enough to use on delicate surfaces including paint, plastic, chrome, anodizing, rubber, carbon fiber and almost anything you throw at it. Can be used at full strength as a heavy-duty cleaner/degreaser or diluted 10:1 to be used as an all-purpose cleaner. Non-toxic, non-flammable and eco-friendly formulation contains no VOCs, harmful acids, CFC's or solvents and is 50 state VOC compliant. Designed for use in a Maxima Foam Cannon (or other adjustable sprayer) and a pressure washer. Can be used full strength as a degreaser or diluted 10:1 as an all-purpose cleaner for use on nearly all surfaces.

- Surface tenacious, thick foam clings to the surface
- 100% biodegradable
- Can be diluted 10:1 as an all-purpose cleaner
- Advanced micro chemistry protects metal and alloys
- 50 state VOC compliant

FOAM CANNON

ATTACHMENT FOR PRESSURE WASHER ACCESSOIRE POUR LAVEUSE À PRESSION

How To Use / Comment utiliser

1. Fill Foam Cannon with Maxima Racing Oils Bio Foam (or desired solution)
2. Connect Foam Cannon with 1/4" quick connect joint to pressure washer trigger sprayer
3. Use Foam Cannon dial and adjustable tip for desired foam thickness and width

- Adjustable settings for desired foam thickness and width
- Easily attaches to most 1/4" quick connect pressure washer trigger sprayers
- Manufactured with durable polymer and brass fittings
- Cannon capacity - 32 fl oz.

OCTANE BOOSTER BOOSTER D'OCTANE

Klotz Octane Booster is a concentrated tetraethyl lead substitute formulated to increase the octane rating of gasoline up to 10 numbers or more. Helps eliminate engine damaging detonation, spark knock, pre-ignition, and pinging from low octane gasoline. Octane Booster modifies the burn speed and flash point of gasoline to create a stable combustion chamber flame front, maximizing performance and power. Stabilizes oxygenated gasoline to prevent lean-out conditions. Klotz Octane Booster provides needed upper cylinder lubrication that is missing in unleaded gasoline.

HIGHER OCTANE BOOSTER BOOSTER D'OCTANE SUPÉRIEUR

- Increases pump gasoline octane up to 10 numbers
- Tetraethyl lead substitute for added lubricity
- Stabilizes flame front and controls burn speed
- Cleans injectors, carburetors and catalytic converters
- O2 and converter safe
- No MTBE
- Absorbs moisture
- Use with caution: Will discolor paint, plastic, and fiberglass

SUSPENSION SPRING PROTECTOR / PROTECTEUR DE RESSORT DE SUSPENSION

The bushing is designed to keep the suspension spring secure in place when the plastic rear arm spring support fails. The bushing prevents the spring from making contact with the track and causing damage. To be used with **Part No. 072-0010** or OEM Rear Arm Spring Support to protect from support failure

Kit Includes:

- Protector, Bolt, Nut, Washer x 2 / each
- Material: Aluminum (6061 T6) + Bolt (SCM435) + Nut (SAE1010)
