DAYCO® POLY-V SERPENTINE BELTS
COURROIES SERPENTINES POLY-V

Dayco's extensive line of Poly-V Serpentine belts are engineered for high mileage, demading drives found in today's vehicles. The aramid reinforced EPDM compounds are designed to resist cracking, elongations and perform better under extreme temperature ranges. Dayco® Poly-V Serpentine Belts deliver OE required quality, and meet and exceed SAE J1459 and SAE J2432 specifications.

- A robust design that guarantees resistance, reliability, low noise and longer service life
- Specially treated cords within the belt that resist stretching and ensure length stability
- Materials that are engineered to handle high torque and power pulses
- Engineered for demanding drives with multiple accessories such as air conditioning, power steering pumps, alternators, water pumps, vacuum pumps and operating conditions with temperatures up to 130°C/266°F

ALL BALLS FLOAT BOWL GASKET
JOINT DÉTANCHÉITÉ DE LA CUVE POUR CARBURATEUR

An economical way to reseal a leaky carburetor. Includes one gasket per kit. Multi carburetor bikes will require multiple kits. Applications that use paper float bowl gaskets are upgraded to high performance interface gasket material NBR rubber gaskets. NBR has excellent resistance to the ethanol used in today's fuels

VFORCE REED VALVES
ADAPTEUR D'ADMISSION DE CARBURATEUR

Features a unique design with double the reed tip surface of standard reed valves. This means the petals move half the distance for the same airflow—boosting efficiency, improving sealing, and reducing wear. With less movement, the petals last longer and deliver better performance across the powerband. Rubber overmolding on the reed tips further increases durability.

- More airflow = more horsepower
- Stronger low-end, mid-range, and top-end power
- Longer reed petal life
- Quick, screw-free reed changes

TRANSMISSION

DRIVE BELTS / COURROIES D'ENTRAÎNEMENT

ULTIMAX XS

Designed for high-horsepower machines, the XS belt features advanced heat-tolerant materials, a strong Aramid cord, and a new compound that allows it to run cooler, longer, and faster. It's built for extreme durability and top performance under demanding conditions.

ULTIMAX MAX

Known for its quality and reliability, the Max belt uses premium rubber and Aramid cord. It's ideal for riders who demand high performance and durability, continuing the Ultimax legacy of innovation.

ULTIMAX PRO

An evolution of the Ultimax 3, the Pro belt has a thicker cross-section for better clutch contact and reduced slippage, leading to faster acceleration. Its new cog design improves flexibility and heat dissipation, resulting in cooler operation and longer belt life.

DRIVE BELTS / COURROIES D'ENTRAÎNEMENT

HP (HIGH PERFORMANCE)
SNOWMOBILE BELT / COURROIE DE MOTONEIGE

Manufactured from aramid reinforced polychloroprene rubber compound and p-aramid cord to ensure superior strength, long-lasting dimensional integrity and longer belt life, this snowmobile belt ensures the dependable, smooth performance that you and your family prefer for leisurely, carefree days of trail riding. This Dayco HP Snowmobile Belt has been carefully inspected at the factory and has met rigid manufacturing specifications.

THE DAYCO HP SNOWMOBILE BELT IS COVERED BY A LIMITED ONE-YEAR WARRANTY.

HPX (HIGH PERFORMANCE EXTREME)
SNOWMOBILE BELT / COURROIE DE MOTONEIGE

Featuring Dayco's TOP COG design for increased flexibility and longer belt life, this high horsepower belt is constructed with over-sized p-aramid cords and CVT rubber compounding to deliver the increased strength and durability that's required to stand up to today's higher snowmobile engine RPM's and operating temperatures. Enjoy the exhilaration that comes from knowing that when you need to "clutch-down", the Dayco HPX Snowmobile Belt will deliver a full range of power to attack any terrain without a loss of horsepower. This Dayco HPX Snowmobile Belt has been carefully inspected at the factory and has met rigid manufacturing specifications.

THE DAYCO HPX SNOWMOBILE BELT IS COVERED BY A LIMITED ONE-YEAR WARRANTY.

XTX (XTREME TORQUE)
SNOWMOBILE BELT / COURROIE DE MOTONEIGE

Introducing Dayco's revolutionary XTX High Horsepower Drive Belt. Bred from a rich history of experienced belt builders, the new XTX is specifically engineered to maximize the performance of high horsepower snowmobiles. Beating the competition on the CSRA race course is just one of many aspects that set the XTX belt apart from its competition. Specially formulated high temperature Polymer along with the highest level of engineered reinforcement proves to perform better in belt operating temperature and efficiency than leading competitors. Its innovative break-through design of deeper cogs on top and rounded cogs on the bottom yield the advantages of ultimate flexibility and longer belt life.

THE DAYCO XTX SNOWMOBILE BELT IS COVERED BY A LIMITED ONE-YEAR WARRANTY.

- Better performance during deceleration (MORE RESPONSIVE ENGINE BRAKING)
- Tested and proven reliability at well over 12,000 RPMS
- A cooler-running temperature than the leading competitors
- Faster and more consistent throttle response at high speeds
- Quicker throttle response at mid-speed acceleration
- Greater secondary acceleration at high RPMS
- Greater secondary acceleration as primary acceleration increases
- Providing more power to track
- Reduction in slippage during the highest levels of torque

CARBIDES AND WEARBARS / CARBURES ET BARRES D'USURE

Main Features:

- 7/16" Carbon steel host bar, with a flat top to prevent "bar roll" during aggressive cornering
- Carbides are made of YG13 Tungsten that provides the ultimate tensile strength for extreme durability and hardness to reduce chipping and increase longevity
- The 90 degree angle of carbide into the pocket of our runners makes for very large cross sections compared to other designs
- 1" Carbide segments allow for flex in ski without compromising carbide adhesion
- Engineered and test fitted to precisely fit your ski for easy install chamfered ends to reduce catching when backing up and unloading
- Extended studs to allow for ski skins
- All necessary fastening Nyloc nuts included
- All carbides and wear bars are finished in black rust preventative
- Some models may require drilling

DEFENDER

- Features hardweld on contact area of host bar, giving it more depth to increase longevity
- Less damaging to concrete and asphalt surfaces

RIPPER

- Features 4" of 75 degree tungsten carbide
- This carbide is less aggressive and has a longer wear period
- Hardwelded in the front and back of the carbide for extended durability
- Recommended for use with lightly studded tracks or no studs

CARBIDES / CARBURES

STUD BOY® products provide the safety and performance that gets the power to the ground while maintaining confidence in snowmobile control. Traction control products puts ease in knowing your snowmobile will respond the way you need it to, and STUD BOY® stud & wearbar products will provide this confidence!

SHAPER BAR

The "Shaper"™ Bar takes the wearbar design and performance to a new level! This bar offers a unique shape that provides much better turning than conventional bars and offers a 20% weight savings too! The concave side profile on the "Shaper"™ Bar grabs and holds snow rather than allowing snow to slip by like other. While the shape of this bar improves the turning radius of your sled on the trail, the large 60° carbide provides great control and wear on hard surfaces. Zinc plated to resist corrosion and eliminate paint in threads.

ENDURO BAR

The "Enduro Bar" is our newest runner designed to be big and bold on the trail. Offering a rectangular shape .437" wide x .650" deep providing great handling and durability with 60° degree cutting carbide. This runner is easy on the arms while still maintaining very aggressive turning with tight radius corners being no problem. E-coated in a corrosion resistant black finish.

STARTER DRIVE REBUILD KIT
KIT DE RECONSTRUCTION POUR DÉMARREUR

Polaris™ does not sell the gears individually. You have to buy the entire cast pinion bracket assembly at an incredibly high price. We include 2 size spacers in our kit so 1 kit can be used to rebuild the starter pinion on OEM# 3089759, 1204130, and 1204372.

WATER TEMPERATURE SENSORS
CAPTEURS DE TEMPÉRATURE DU LIQUIDE DE REFROIDISSEMENT

Temperature Sensors work with the machines computer system to measure/monitor engine temperature including the lube/oil and coolant in order to control radiators, cooling fans, and thermostats. If the sensor fails, a warning light will usually show up on the machine. This could lead to overheating, or improper running conditions if not replaced.

AIR TEMPERATURE SENSOR
CAPTEUR DE TEMPÉRATURE DE L'AIR

An air temperature and pressure sensor monitors intake air conditions to help the ECU optimize the air-fuel mixture, improving engine performance, efficiency, and throttle response. A faulty air temperature or pressure sensor can cause rough idling, reduced power, poor fuel economy, and increased emissions.

SNO-STUFF WINDSHIELDS / PARE-BRISE

Diversity is something we have come to expect from the Powersports industry. Colors, shapes, sizes –we want it all. Well good news, our quality line of Sno-Stuff windshields does not disappoint. High, low, med, clear, smoke, coloured graphics, no graphics, custom flared, or OEM replacement –the choice is yours. In our case, looks and quality go hand in hand. All our windshields are made from super strong, crystal clear material and are produced under high standards for quality assurance. Our standard windshields are, in most cases, exact OEM replicas. For those of you who want to make a statement, check out our Custom/ Flared sections for hot new graphics and styling. Either way diversity, choice, and quality are the name of the game.

Remember when ordering windshields that the retainers, O-rings, and darts need to be purchased separately.

MEASURING YOUR WINDSHIELD Measure from the top of the dash to the tip of the windshield. Subtract one inch for the tabs.

ARCTIC CAT™

Designed with the stock look in mind, our Standard replacement offers the same graphics, shape, and height profiles as the OEM windshield that came with your sled. In most cases, we also offer additional height and color choices that you cannot get from your sled manufacturer yet remain true to the STOCK look, while adding a little extra comfort and style.

POLARIS™

Unique styling and graphics is what sets these windshields apart from our standard replacements. Bold graphics make that custom statement for your sled while the unique flare design offers superior hand & upper body protection from the elements. Also choose from our Custom/Flared Windshield selection.

SNO-STUFF WINDSHIELDS / PARE-BRISE

SKI-DOO™

Designed with the stock look in mind, our Standard replacement offers the same graphics, shape, and height profiles as the OEM windshield that came with your sled. In most cases, we also offer additional height and color choices that you cannot get from your sled manufacturer yet remain true to the STOCK look, while adding a little extra comfort and style.

YAMAHA™

Unique styling and graphics is what sets these windshields apart from our Standard replacements. Bold graphics make that custom statement for your sled while the unique flare design offers superior hand and upper body protection from the elements. Also choose from our Custom / Flared Windshield selection.
